

Elgg Importer plugin V3.183 powered by Openinviter Library.

Visit <http://webgalli.com/> for supports and Elgg plugins

---

PRO VERSION : <http://www.webgalli.com/pg/groups/770/contacts-importer-plugin/>

GPL : <http://community.elgg.org/pg/plugins/project/384461/developer/webgalli/contacts-importer-plugin>

### **Requirements**

Your server will need to have PHP5 installed with DOM Document support and either CURL or WGET.

### **Installation Info**

1. Unzip > Upload all files to the mod directory > Enable it (Most probably you have done it by now)
2. Go to <http://openinviter.com/download.php> > Register there > Download an On server / Hosted version of openinviter library
3. Unzip it > Copy the contents of the whole download package to mod/importer/vendors/openinviter
4. Now run the postinstall.php file inside <http://yoursite.com/mod/importer/openinviter/postinstall.php>
5. Delete the postinstall.php file if everything is ok
6. Go to <http://yoursite.com/import> and start inviting your friends

### **Trouble Shooting**

In case if any module stops functioning, remove all the open inviter library files, download a new version of openinviter library repeat the installation process step 3 to 5

Thats all :)
